## Professional Experience

### Front-end developer

at TBSCG.

Since Feb 2022

Developing multi-platform cloud-based applications. Tech includes Vue and Ionic.

### Front-end developer

at CGI.

From Aug 2019 to Jan 2022 (2.5 years)

Built the frontend for an international marketplace for businesses. Mainly did:

- Used build tools like Webpack
- Implemented linting with ESLint
- Introduced accessibility
- Implemented Google Analytics
- Used LESS, JavaScript and JSP

Worked for other projects which implied:

- Using Angular with Typescript
- SASS

### Full-Stack developer

at PalacioWeb/WebMonster.

From Feb/2018 to Aug/19 (1.5 years)

Built apps for different clients, including backend and frontend technologies:

- Node.js with Express
- Vue.js
- Basic DevOps with Docker, Docker-Compose, and GitHub Actions
- SEO optimization of a SPA made with Vue.js (pre-rendering)
- Implemented Google Analytics
- Deployed different services to cloud platforms such as AWS.

## Personal projects/demos

**Demo project – Seguridad SL** - <https://damageesp.github.io/seguridad-sl/>

Made with Vue.js. Deployed to GitHub pages. Firebase for DB and binary storage.

**Demo project – Stock checker** - <https://damageesp.github.io/stock-checker-site/>

Made with React. Deployed to GitHub pages. Firebase for DB and auth.

## Experience Snapshot

### Technical specialization

- JavaScript (ES6+), Node
- Vue.js, React
- CSS3, SCSS, LESS

### Strengths

- Passionate about code and all things tech
- Unafraid of new challenges
- Can easily work autonomously
- Very communicative in a team environment
- Excellent English level
