## Professional Experience

### Senior Frontend Engineer

at cargo.one.  
since Aug 2022 (+2.5 years)

Building a global air cargo platform using Vue.js and Python with a team spanning over 15 countries. Built tools that help forwarders get rates, quote and ship faster daily.

### Senior Frontend Engineer

at TBSCG.  
Feb 2022 – Aug 2022 (6 months)

Developed a multi-platform IoT app using Ionic and Vue.js that enables businesses to manage their trucks remotely.

### Frontend Engineer

at CGI.  
From Aug 2019 to Jan 2022 (2.5 years)

Worked in an international team building a B2B marketplace using an MVC stack. Took ownership of our frontend codebase and migrated and improved our build and code quality tools. Introduced accessibility and Google Analytics.

### Full-Stack Developer

at PalacioWeb/WebMonster.  
From Feb/2018 to Aug/19 (1.5 years)

Worked closely with local clients to build solutions for their businesses, including custom apps using mainly JavaScript as well as WordPress sites and plugins.

## Side projects

**Mercaprecios** - <https://www.mercaprecios.info/>

Keeps track of changes in grocery prices by parsing receipts contributed by the community. Made with Nuxt 3 (Vue.js 3) and TypeScript. Deployed to Vercel.

**Seguridad SL** - <https://damageesp.github.io/seguridad-sl/>

Demo app made with Vue.js and Firebase. Deployed to GitHub pages.

**Stock checker** - <https://damageesp.github.io/stock-checker-site/>

Demo app made with React and Firebase (DB + auth). Deployed to GitHub pages.
